PROFILE

Detail-oriented Data Science and Full Stack Development student skilled in building scalable web and AI-based applications. Proficient in Python, MERN stack, FastAPI, and React Native with a strong foundation in data analysis, machine learning, and backend systems. Focused on delivering efficient, user-centric, and performance-driven solutions.

EDUCATION

Assam Down Town University

Guwahati, India

Bachelor of Computer Application | CGPA 8.02

2023 – 2026

Kendriya Vidyalaya Rangapahar (CBSE)

Dimapur, India

Higher Secondary (12th Grade) – Humanities | 77%

2022 – 2023

Secondary School (10th Grade) | 72%

2020 – 2021

SKILLS

- Python, Data Analysis, Data Cleaning, Machine Learning, NLP
- MERN Stack (MongoDB, Express.js, React.js, Node.js)
- FastAPI, Django, SQL, MySQL
- React Native, REST APIs
- Problem Solving, Communication, Teamwork

CERTIFICATIONS

- Cloud Computing and Distributed Systems – SWAYAM (2026)
- Introduction to IoT – SWAYAM (2025)
- Node.js (Basic) – HackerRank (2025)
- Supervised Machine Learning: Regression – Coursera (2024)
- Introduction to IT and AWS Cloud – Coursera (2024)
- SQL (Intermediate) – HackerRank (2024)
- Python (Basic) – HackerRank (2024)

EXPERIENCE

Data Science Virtual Intern

CodSoft | June 2025 – July 2025

- Analyzed datasets of 5,000+ records using Python (Pandas, NumPy) to extract insights and prepare clean data
- Built and tested machine learning models, increasing prediction accuracy by ~15%
- Designed data pipelines that reduced manual preprocessing effort by ~30%
- Applied evaluation techniques and visualization methods to improve model reliability

PROJECTS

AI-Based Driver Drowsiness & Micro-Sleep Detection

- Developed a real-time driver monitoring system using Python, OpenCV, and MediaPipe for drowsiness and micro-sleep detection.
- Implemented Eye Aspect Ratio (EAR) and facial landmark tracking to monitor driver alertness and detect fatigue.
- Integrated real-time audio alerts, visual warnings, and event logging for enhanced road safety.
- Achieved **93.51% accuracy** with an average processing latency of **27.36 ms** on standard hardware.

AI-Powered Resume Parser

- Designed a scalable resume parsing system using MERN stack and FastAPI handling 30–40 resumes per batch
- Extracted structured candidate data using NLP techniques and stored results in MongoDB
- Created a ranking algorithm that reduced manual screening effort by ~60%

Local News Mobile Application

- Created a React Native mobile app for delivering categorized local news content
- Optimized navigation and UI responsiveness for better user experience
- Enhanced app performance for smooth operation on Android devices

3-Factor Authentication System (Smart India Hackathon 2024)

- Architected a secure authentication system combining password, OTP, and identity verification
- Strengthened system security through multi-layer authentication mechanisms
- Collaborated with a team to design workflows and system architecture

Railway Reservation System

- Built a web-based system using Django and MySQL for ticket booking and management
- Integrated authentication, train search, booking, and fare calculation modules
- Managed structured databases for users, schedules, and transactions
- Optimized backend operations for efficient data handling
